

Information Bulletin #1977

29/01/2019

Affected Disciplines:

Motocross

Information Pertains to:

National and State issued numbers for MX

New Information:

MA are adopting a system for riders that have been issued with a national number which will enable them to compete at state events, without having to change their numbers or jerseys.

This will apply at state rounds where a state has already allocated the same number to a competitor.

The addition of a 50mm letter "N" after the number as pictured below is what is being adopted as a countermeasure for this issue.

This will only be required when a competitor has been issued with a national number and a different competitor has been issued with the same number by their state and are competing at the same state event.

The competitor who has been issued with the national number will be able to have a separate sticker "N" which they can add to their number plate when necessary.

Hopefully this will help the states attract national competitors to their events and help lift the profile of the event.

Effective from:

Immediately
